Despliegue

En este proyecto comenzaremos desde 0.

1. Instalar un servidor web con determinados servicios.

Requirements on the server side

- PHP 7.4 or greater
- MySQL 5.7 or MariaDB 10.3 or greater
- HTTPS support

En nuestro caso usaremos xampp.

2. Arrancar Apache y MySQLDatabase
3. Descargar WP. Acuérdate que iremos a wordpress.org
4. En el directorio de xampp/htdocs vamos a alojar el comprimido descargado.
5. Creamos un nuevo directorio llamado centro. Descomprime la carpeta de wp dentro de este directorio.
6. Acceder con un navegador a localhost y accedemos a PHPMyAdmin.
7. Creamos una BBDD que llamaremos centroBD con codificación utf8_spanishbbdd.

Crear base de datos

centroBBDD

utf8mb4_spanish2_ci

Crear

8. Accedemos al instalador. Para ello desde un navegador pondremos la url localhost/centro

Welcome to WordPress. Before getting started, you will need to know the following items.

1. Database name
2. Database username
3. Database password
4. Database host
5. Table prefix (if you want to run more than one WordPress in a single database)

This information is being used to create a `wp-config.php` file. **If for any reason this automatic file creation does not work, do not worry. All this does is fill in the database information to a configuration file. You may also simply open `wp-config-sample.php` in a text editor, fill in your information, and save it as `wp-config.php`.** Need more help? [Read the support article on wp-config.php.](#)

In all likelihood, these items were supplied to you by your web host. If you do not have this information, then you will need to contact them before you can continue. If you are ready...

Let's go!

9. Configuramos el acceso a la bbdd

Below you should enter your database connection details. If you are not sure about these, contact your host.

Database Name

The name of the database you want to use with WordPress.

Username

Your database username.

Password

 Show

Your database password.

Database Host

You should be able to get this info from your web host, if localhost does not work.

Table Prefix

If you want to run multiple WordPress installations in a single database, change this.

Submit

10. Completamos el siguiente formulario

Welcome

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

Information needed

Please provide the following information. Do not worry, you can always change these settings later.

Site Title

Mi centro WP

Username

admin

Username can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol.

Password

123456

 Hide

Very weak

Important: You will need this password to log in. Please store it in a secure location.

Confirm Password

☒ Confirm use of weak password

Your Email

carmen@iesdoctorbalmis.com

Double-check your email address before continuing.

Search engine visibility

☐ Discourage search engines from indexing this site

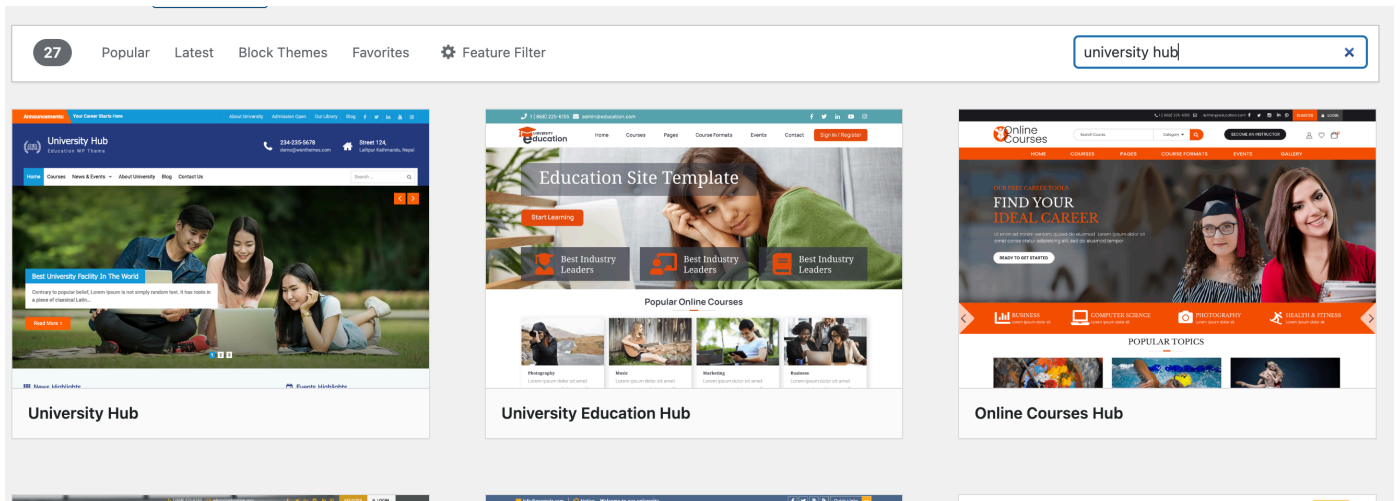

It is up to search engines to honor this request.

Plantillas

Vamos a seleccionar una plantilla dentro del repositorio de WordPress.

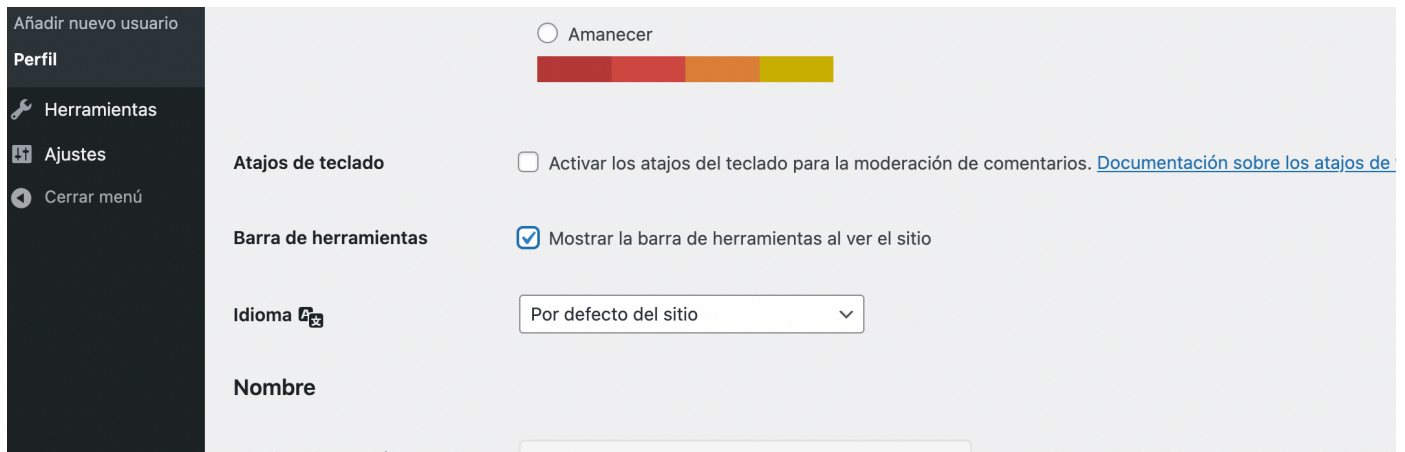

1. Vamos a Apariencia-> Temas y presionamos sobre añadir tema.
2. Buscamos tema "university hub"

3. Activamos el tema
4. Dirígete al sitio para ver que todo ha sido correcto localhost/centro

5. Editando el perfil puedo quitar la barra de administración del sitio

Personalizar el sitio

1. Entramos al modo administrador de nuestro WordPress (acuérdate localhost/nombre-sitio/wp-admin)
2. Accedemos a la plantilla y le damos a personalizar para cambiar aspectos de la plantilla.
